

Forest Service, USDA

§ 228.51

the protection of public safety, health, and the environment, to the extent that such standards are not in conflict with Federal purposes and functions.

GENERAL PROVISIONS

§ 228.47 General terms and conditions of contracts and permits.

(a) *Disposal of designated mineral materials.* Only those specified mineral materials found within the area designated in the contract or permit may be extracted and removed.

(b) *Unauthorized removal (trespass) of mineral materials.* The removal of mineral materials from National Forest lands, except when authorized in accordance with applicable law and regulations of the Department of Agriculture, is prohibited (36 CFR 261.9).

(c) *Conservation.* Mineral material contracts and permits must contain provisions to ensure the efficient removal and conservation of the mineral material.

(d) *Improvements.* Contracts and permits must contain provisions for removal or Government retention of improvements.

(e) *Use of existing National Forest development roads.* The authorized officer may require purchasers and permittees to obtain appropriate road-use permits, make deposits for or perform their commensurate share of road maintenance, and comply with road-use rules contained in 36 CFR part 212, depending upon their planned extent of road use.

(f) *Reclamation.* Requirements for reclamation of areas disturbed by mineral material operations must be included in contracts and permits, except for disposals from community sites and common-use areas.

§ 228.48 Appraisal and measurement.

(a) *Appraisal.* All mineral materials for sale must be appraised to determine fair market value. Appraisals must be based on knowledge of the extent of the deposit, quality of material, and economic value. A sale must not be made at less than the appraised value which may be expressed as either price per cubic yard or weight equivalent. In all cases the units of measurement must correspond to the units used in the appraisal. The authorized officer must es-

timate and record the amount and value of minerals to be disposed of by free-use permit.

(b) *Measurement.* The amount of mineral material actually removed may be measured by volume, weight, truck tally, by combination of these methods, or by such other form of measurement as the authorized officer determines to be appropriate and in the public interest.

§ 228.49 Reappraisal.

If an extension of time is granted as provided in § 228.53(b), the authorized officer must reappraise or reestimate the mineral materials covered by the contract or permit and which remain unexcavated at the time of extension. The recalculated unit value becomes the new unit value for the remaining unexcavated material; excavated and stockpiled material is not subject to reappraisal.

§ 228.50 Production records.

At least annually, the purchaser or permittee must furnish a record of the volume extracted, in cubic yards or weight equivalent, to the authorized officer. The units of measurement must correspond to the units used in the appraisal or estimate.

§ 228.51 Bonding.

(a) *Bond requirements.* Before operations may begin under any contract or permit, a bond must be furnished to the authorized officer to ensure performance of payment (as necessary), reclamation, and other conditions of the contract or permit, except as noted in paragraphs (a) (1) and (3) of this section, where the authorized officer may waive such bonding. If an extension of time is granted as provided in § 228.53(b), the bond requirements must be recalculated and changed accordingly.

(1) For *advance payment contracts* for 10,000 cubic yards or more in volume (or weight equivalent), a bond of not less than 10 percent of the total contract price or the value of the estimated annual production (whichever is less), plus the reclamation cost for the area covered by annual mining, is required. When the total volume is less

§ 228.52

than 10,000 cubic yards, bond requirements, if any, are at the discretion of the authorized officer.

(2) For any *deferred payment contract*, a bond equaling the value of the estimated annual production plus the reclamation cost for the area covered by annual mining is required.

(3) For *free use*, the authorized officer may require a reclamation bond which must be sufficient to cover the cost of reclamation of the anticipated annual work.

(b) *Types of bonding*. A bond must be one of the following:

(1) A bond of a corporate surety shown on the latest approved list issued by the U.S. Treasury Department and executed on an approved standard form;

(2) A cash bond;

(3) Negotiable securities of the United States;

(4) An irrevocable letter of credit acceptable to the Forest Service;

(5) A performance bond required by other Forest Service contracts or permits, provided the bond covers the performance and reclamation requirements related to the removal of mineral material from a designated pit or area for use in the performance of the contract or permit; or

(6) Any other types of bond specified in the Forest Service Manual.

§ 228.52 Assignments.

(a) *Limitations*. A purchaser or permittee may not assign the contract or permit, or any interest therein, without the written approval of the authorized officer.

(b) *Requirements of assignee*. The authorized officer will not approve any proposed assignment involving contract or permit performance unless the assignee:

(1) Submits information necessary to assure the authorized officer of the assignee's ability to meet the same requirements as the original purchaser or permittee (assignor); and

(2) Furnishes a bond or obtains a commitment from the previous surety to be bound by the assignment when approved.

(c) *Rights and obligations*. Once the authorized officer approves an assignment, the assignee is entitled to all the

36 CFR Ch. II (7-1-11 Edition)

rights and is subject to all of the obligations under the contract or permit, and the original purchaser or permittee may be released from any further responsibility under the contract or permit.

§ 228.53 Term.

(a) *Time allowed*. Except as provided in § 228.61(f), § 228.62(b), and elsewhere in this paragraph, a contract or permit may not exceed 1 year from the effective date of the contract or permit unless a written extension is obtained. For those mineral materials sold under a duration of production contract or under a contract for the sale of all mineral material within a specified area, or under a construction contract where removal cannot reasonably take place before completion of other work under the same contract, the authorized officer will establish a reasonable time period for removal.

(b) *Extension of time*. If it is shown that a delay in removal was due to causes beyond the control of the purchaser or permittee, the authorized officer may grant an extension, not to exceed 1 year, upon written request. Written requests for extensions of contracts must be received between 30 and 90 days before the expiration date of the contract. Written requests for extensions of permits must be received between 15 and 90 days before the permit expiration date. The authorized officer may grant a total of two extensions for contracts and permits.

§ 228.54 Single entry sales or permits.

The purchaser or permittee is required to reclaim a single entry source in accordance with an approved operating plan which describes operating procedures and reclamation measures, unless the requirement is waived by the authorized officer.

§ 228.55 Cancellation or suspension.

The authorized officer may cancel or suspend a contract, permit, or prospecting permit if the purchaser or permittee fails to comply with its terms and conditions. If the noncompliance is unnecessarily or unreasonably causing injury, loss, or damage to surface resources, the authorized officer may cancel or suspend the contract, permit,
